

BLASTJET OY

AN INDUSTRY LEADER IN EQUIPMENT FOR ABRASIVE BLASTING AND SHOT BLASTING

Blastjet blasting cabinets and equipment are a result of decades of research, testing and innovation. Our products and services have earned a solid reputation among our customers in a variety of sectors such as manufacturing, aviation, and technical institutes.

READ MORE

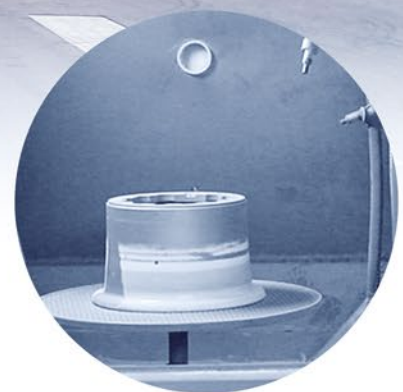

WHAT WE OFFER

We have a large selection of standard cabinets and equipment for abrasive blasting and shot blasting. These are equally suited for heavy-duty industrial work and metalwork classes at technical institutes. We design and manufacture machines for fully automated, semi-automated, and manual applications. For automated applications we use only industry-leading FANUC robots.

We are also happy to manufacture a custom cabinet to meet your specific needs.

OUR PRODUCT RANGE:

- **BJ-E series:** bottom-suction ejector cabinets
- **BJ-EC series:** cyclone separator ejector cabinets with automatic filtration
- **BJ-PC series:** cyclone separator pressure vessel cabinets with automatic filtration
- Abrasive blasting cabinets with two blast settings and/or painting/abrasive blasting combination cabinets
- Customer-specific automated / half-automated / manual applications

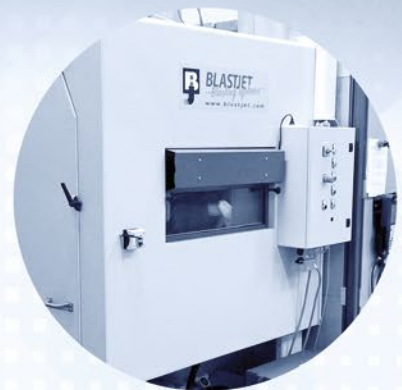

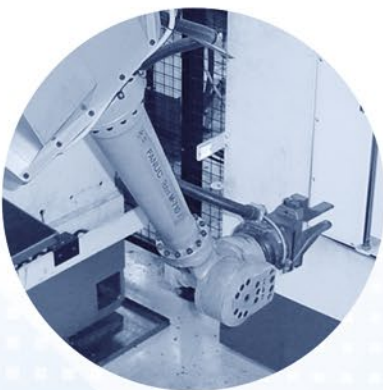

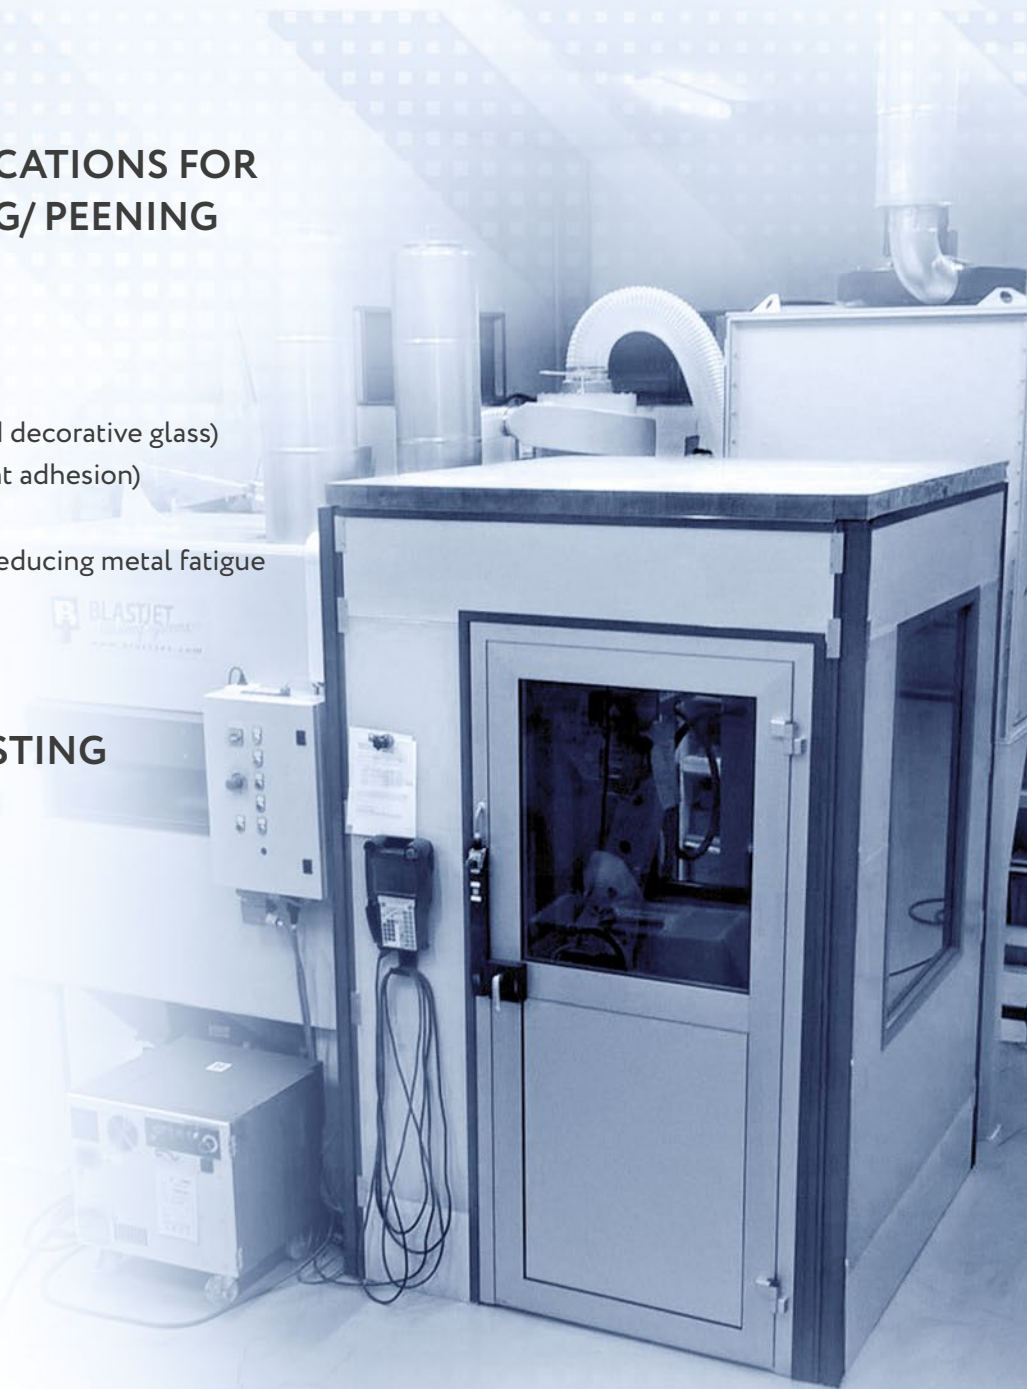

**Our latest application for aircraft wheel rim maintenance:
A fully automated robotic blasting machine for blasting aircraft wheel rims with plastic granulate.**

TYPICAL APPLICATIONS FOR SHOT BLASTING/ PEENING

- paint removal
- rust removal
- matt finishing
(for design glass and decorative glass)
- roughening (for paint adhesion)
- deburring
- surface hardening, reducing metal fatigue

COMMON BLASTING MATERIALS

- glass beads
- steel grits
- steel shot
- aluminium oxide
- plastic granulate
- SiO carbide
- stainless steel grit
- stainless steel shot

We are happy to manufacture a custom cabinet
to meet your specific needs.

WHERE WE COME FROM

While the Blastjet company was founded in 1993, the start of our product development dates back to the 1970s. The owners, with some 60 years of experience between them, have created a number of technological innovations in the industry. Today, Blastjet is the leading designer and manufacturer of abrasive blasting and shot blasting cabinets in Finland, with more than 700 machines delivered.

WHY CHOOSE A BLASTJET MACHINE?

Built for durability and performance, all our machines are thoroughly tested before delivery. They are low maintenance and easily serviced, and spare parts are always readily available.

Standard cabinets don't live up to your needs? We'll be happy to build one exactly as per your specifications.
